Chinmay Wadhwa

Software Developer | Full-Stack Developer
+91-8290087742 | chinmaywadhwa01@gmail.com | GitHub | LinkedIn

Profile Summary

Software Developer with professional experience in full-stack web development, building and deploying modern web applications across frontend and backend layers. Strong frontend development experience with JavaScript, TypeScript, responsive UI development, interactive web experiences, and Three.js-based 3D development. Experienced in Node.js, Express.js, REST APIs, authentication, PostgreSQL, SQL, database integration, Git, and application deployment. Proven experience debugging and resolving **100+ software bugs and issues** across application development and maintenance. Comfortable working across the development lifecycle from implementation and API integration to debugging, optimization, and deployment.

Education

JECRC Foundation — Jaipur, India
Bachelor of Technology — Electronics and Communication Engineering — *Nov 2021 – May 2025*

Experience

Full-Stack Developer — Jul 2026 – Present
Digimate Tech Pvt. Limited — *Jaipur, India*

- Working as a **Full-Stack Developer**, building and maintaining production web applications across frontend, backend, database, and deployment layers.
- Developing responsive and interactive web applications using **React, TypeScript, JavaScript, Tailwind CSS, and modern frontend development practices**.
- Building and integrating backend services and **RESTful APIs using Node.js, Express.js, and TypeScript**, including authentication, validation, business logic, and API integration.
- Working with **PostgreSQL, SQL, and MongoDB** for database design, CRUD operations, data modeling, queries, and application workflows.
- Developing and maintaining multiple production projects including **Digimate Tech Digital Solutions, Vexo, EstateCRM, and Dezoryn**, working across frontend and backend requirements.
- Debugging and resolving application issues across frontend, backend, API, database, and deployment layers, contributing to the resolution of **100+ bugs and development issues**.
- Worked with **Git and GitHub** for version control, feature development, code management, and collaborative development workflows.
- Participated in the complete development lifecycle including **requirement understanding, implementation, API integration, testing, debugging, optimization, and production deployment**.

Junior Full-Stack Developer Intern — Feb 2025 – Jul 2025
Kvon Technologies — *Jaipur, India*

- Developed backend services and web application functionality using **Node.js, Express.js, and SQL**.
- Designed and implemented **RESTful APIs** supporting CRUD operations, frontend-backend integration, and database-driven application workflows.
- Implemented **JWT-based authentication and Role-Based Access Control (RBAC)** for securing application routes and user-specific functionality.
- Worked with SQL databases to perform CRUD operations, write queries, and maintain application data.
- Tested and debugged APIs using **Postman**, investigated backend issues, and collaborated with developers during feature development and debugging.
- Used **Git and GitHub** for version control and collaborative development workflows.

Professional Projects

Digimate Tech Digital Solutions — Full-Stack Web Platform — 2026
Developed at Digimate Tech Pvt. Limited — *Live*

- Built the **complete backend** for Digimate Tech Digital Solutions, including backend architecture, REST APIs, database integration, and core application workflows using **Node.js, Express.js, and TypeScript**.
- Designed and implemented **PostgreSQL database schemas, SQL queries, and CRUD operations** to support application data, business logic, and frontend workflows.
- Implemented **authentication, authorization, validation, error handling, API testing, debugging, optimization, and production deployment**.
- Later developed the **complete frontend** of the platform using **React, TypeScript, Tailwind CSS, and responsive UI development**, integrating frontend components with the backend APIs.

- Built reusable components, responsive layouts, interactive interfaces, form workflows, API-driven pages, and client-facing functionality across the application.
- Worked across the complete development lifecycle from **backend architecture and database design to frontend development, API integration, debugging, optimization, and deployment**.

Vexo — Music & Entertainment Platform 2026

Developed at Digimate Tech Pvt. Limited *Live | GitHub*

- Developed a modern music and entertainment web application with responsive and interactive user interfaces.
- Built reusable frontend components and responsive layouts focused on maintainability, usability, and cross-device compatibility.
- Integrated frontend functionality with backend services and APIs for dynamic data handling and user interactions.

EstateCRM — Real Estate Management Platform 2026

Developed at Digimate Tech Pvt. Limited *Live | GitHub*

- Developed a real-estate management application for handling property-related information and business workflows.
- Implemented responsive frontend interfaces using reusable components and API-driven data handling.
- Worked across frontend and backend functionality to integrate application interfaces with backend services and PostgreSQL database workflows.

Dezoryn 2026

Developed at Digimate Tech Pvt. Limited *Live | GitHub*

- Developed an interactive web application with a focus on modern frontend architecture, responsive design, and user experience.
- Implemented reusable components and interactive UI functionality using modern JavaScript and TypeScript development practices.
- Contributed to application integration, debugging, optimization, and production deployment.

Personal Projects

SkillLoop — Skill Exchange Platform 2025

Personal Full-Stack Project *Live | GitHub*

- Designed and developed a full-stack skill exchange platform that enables users to create profiles, discover skills, participate in quizzes, and interact through skill-based functionality.
- Built backend services and **REST APIs** using **Node.js and Express.js** for authentication, user management, and application workflows.
- Implemented **JWT-based authentication and role-specific middleware** to protect restricted application endpoints and user functionality.
- Used **PostgreSQL** for application data management, relational database operations, and application workflows.

Technical Skills

Frontend: React, Next.js, TypeScript, JavaScript, HTML, CSS, Tailwind CSS

3D / Interactive Development: Three.js, 3D Web Experiences, Interactive UI, WebGL

Backend: Node.js, Express.js, TypeScript, REST APIs, JWT, RBAC

Databases: PostgreSQL, pgAdmin, SQL, DB2 for i

Languages: TypeScript, JavaScript, SQL, Python, RPGLE

Developer Tools: Git, GitHub, Postman, VS Code, npm, Linux CLI, pgAdmin

IBM i / RPGLE: RPGLE, RPG IV, Free-Form RPG, Fixed-Format RPG, Physical Files, Logical Files, DB2 for i, Library Lists, CL Commands, MONITOR/ON-ERROR
