Chinmay Wadhwa

+91-8290087742 | chinmaywadhwa01@mail.com | LinkedIn | GitHub

Profile Summary

Full-Stack Developer with hands-on experience building and deploying production-grade web applications using **Next.js, Node.js, and PostgreSQL/MongoDB**. Proficient in REST API design, JWT-based authentication, RBAC, and database optimization. Internship experience in backend debugging and system reliability. Passionate about building scalable, secure, and maintainable systems.

Education

JECRC Foundation — Jaipur, India
Bachelor of Technology — Electronics and Communication Engineering — *Nov 2021 – May 2025*

Experience

Junior Full-Stack Developer Intern — Feb 2025 – July 2025
Kvon Technologies — *Jaipur, India*

- Debugged and resolved backend issues using **API logs, SQL queries, and database inspection**, directly improving system reliability.
- Improved database performance by **30%** through query optimization and indexing strategies on MongoDB and SQL databases.
- Built and maintained **REST API** integrations; identified and fixed performance bottlenecks through systematic API response monitoring.
- Implemented secure authentication flows using **JWT and RBAC**, ensuring role-based access control across backend services.
- Wrote **SQL queries (JOIN, GROUP BY, subqueries)** to validate data integrity and troubleshoot production data inconsistencies.

Projects

FrostFlow — Full-Stack Task Management Platform — 2025
Next.js, TypeScript, Node.js, Supabase (PostgreSQL), JWT, Magic Link Auth — *GitHub*

- Built a full-stack task management web app with **Next.js (App Router)** and **TypeScript**, featuring server-side rendering and API routes.
- Implemented dual authentication — **JWT** and **Magic Link** via Supabase Auth — with session handling and route protection.
- Designed **PostgreSQL schema** with Supabase; optimized queries and indexing to improve data retrieval performance.
- Built **RBAC middleware** enforcing admin and user access control across all protected routes.
- Resolved async race conditions and edge cases in task state management, improving overall reliability.

SkillLoop — Skill Exchange Platform — May 2025
Node.js, Express, MongoDB, REST APIs, JWT — *GitHub*

- Developed backend features including **authentication system, leaderboard, and quiz modules** using Node.js and Express.
- Designed **MongoDB aggregation pipelines** for leaderboard ranking and quiz score computation.
- Implemented **JWT-based auth with RBAC** — separate flows for admin and general users.
- Debugged API and database issues to ensure consistent data flow across all modules.

ShopEase — E-Commerce Landing Page — 2024
React.js, JavaScript, REST APIs — *GitHub*

- Built a fully responsive e-commerce frontend with **React.js**, including product listing, filters, and cart UI components.
- Integrated third-party product APIs to **dynamically fetch and render** product data without page reload.
- Optimized component re-rendering using **React hooks (useState, useEffect, useMemo)** for better UI performance.

Technical Skills

Languages: JavaScript (ES6+), TypeScript, SQL, Python

Frontend: React.js, Next.js (App Router), HTML5, CSS3, Responsive Design

Backend: Node.js, Express.js, REST API Design, Authentication (JWT, RBAC, Magic Link)

Databases: MongoDB, PostgreSQL, Supabase, Query Optimization, Indexing, Aggregation Pipelines

Tools & Platforms: Git, GitHub, Postman, VS Code, Linux (CLI, log monitoring)

Concepts: RBAC, System Reliability, Error Handling, Root Cause Analysis, API Debugging

Training & Certifications

Cybersecurity Certification — 2024
Learn and Build

- Covered system security fundamentals, authentication mechanisms, and common vulnerability patterns.

Full Stack Web Development — June 2023
Upflairs Pvt. Ltd. — *Jaipur, India*

- Built full-stack applications; developed foundational understanding of backend architecture and REST APIs.
